

“Thakur Logistics operates under Standard Trading Conditions (STC) that govern all our freight forwarding, customs clearance, and logistics services. These conditions are designed to protect both our clients and our company by clearly outlining responsibilities, liabilities, and rights. Key provisions include customer obligations to provide accurate information, terms for payments and surcharges, lien and credit rights of the company, and defined limits of liability. Thakur Logistics is not responsible for delays, port congestion, customs fines, or consequential losses; clients are strongly advised to arrange adequate cargo insurance. By engaging our services, clients acknowledge and accept these conditions. The STC ensures transparency and consistency in all dealings, aligning with industry standards and international conventions. Our goal is to provide professional, reliable logistics solutions while maintaining fairness and clarity in transactions. For full details, clients may access our complete Standard Trading Conditions at [STC](#).”
